PROFESSIONAL SUMMARY

Engineering graduate skilled in Python and SQL with hands-on experience in Artificial Intelligence and Machine Learning. Strong foundation in Data Structures and Object-Oriented Programming, seeking an entry level Software Developer role to build scalable solutions.

TECHNICAL SKILLS

- **Languages:** Python, SQL, HTML5, CSS3, JavaScript
- **BackEnd :**Django (ORM, CRUD Operations,Authentication and Authorization) , Django REST API
- **Database :** Oracle SQL, SQLite3, Database Troubleshooting
- **Tools & Platforms:** Git, VS Code, Jupyter Notebook, Google Colab
- **Core Competencies:** Object-Oriented Programming (OOP), Data Structures Algorithms, Database Management
- **Soft Skills:** Communication, Problem Solving, Collaboration, Documentation

WORK EXPERIENCE

Python Full Stack Developer Intern — QSPIDERS, Basavanagudi, Bangalore January 2026 – Present

- Investigated front-end and back-end applications, identified root causes, and proposed solutions.
- Performed SQL queries, database troubleshooting, and log file analysis for issue investigation.
- Collaborated with team members to troubleshoot issues, prioritize by severity, and ensure timely resolution.
- Prepared technical documentation and communicated findings to stakeholders.

AI/ML Intern — SmartBridge & APSCHE May 2025 – July 2025

- Participated in software development activities including requirement analysis, model development, testing, debugging, and deployment.
- Designed and optimized machine learning workflows for image classification tasks.
- Evaluated model performance, analyzed prediction failures, and collaborated on troubleshooting, documentation, and project delivery.

PROJECTS & TECHNICAL INVESTIGATIONS

Flight Booking System (Python, Django, SQLite3, HTML/CSS, JavaScript)

- Developed a full-stack **Flight Booking System** using **Django, Python, and SQLite3** to enable flight search, booking, and passenger management.
- Designed relational database models for **flights, passengers, and user accounts**; implemented CRUD operations, booking history, and cancellation functionality.
- Built secure user authentication with registration, login, profile management, and password reset; developed responsive front-end interfaces using **HTML, CSS, and JavaScript**.

SymptoTrack AI — Hybrid RAG Chatbot for Symptom Monitoring (Python, LangChain, Groq, HuggingFace, SQLite3)

- Developed a Hybrid RAG chatbot for symptom monitoring using Flask, Groq's Llama-3.3-70B LLM, HuggingFace embeddings, ChromaDB, and SQLite3.
- Integrated database management for user sessions and conversation history; optimized SQL queries for efficient data.
- Implemented conversation memory management and user authentication with comprehensive technical documentation.

EDUCATION

B.Tech — Computer Science and Engineering 2026
Sri Venkateswara College of Engineering, Tirupati CGPA: **9.19**

CERTIFICATIONS

- Crash Course on Python — Google
- Analyzing Data with Python — IBM
- Introduction to SQL — IBM

EXTRACURRICULAR ACTIVITIES

- Participated in college technical events, hackathons, and coding challenges.
- Completed self-learning projects in AI/ML and Full Stack Development.
